Where Custom Solutions Become Standard

The question you may be asking yourself could be...

“Why should I buy this product? Since I am comfortable with what I have now...why should I change?”

Let us tell you **why** in these two pages. Give us 10 minutes of your valuable time to introduce you to a whole new world of air preparation solutions. At Monnier, we believe that you deserve to have **what you want, the way you want it, when you want it**. Not a bad deal...a manufacturer actually giving the customer what they ask for. It's a pretty simple philosophy and one that we live by at Monnier.

If you are not convinced that Monnier Air Preparation Products are the **finest quality products in the industry**, we thank you for your time and hope that in the future you will refer back to these pages and give us another try.

On the other hand, if you choose to go with a standard Monnier air preparation product or a custom engineered solution simply **fill out the form in the back of the catalog and fax it to us**. It's that easy!

Model #s 92-204:
Filter Assembly for
the Plastic Industry

Model # 91-206:
Air/Oil Regulator for OEM

The only thing standing between you and having the ideal product for your application are these two little pages. So we'll let you get right to it.

WHAT YOU WANT

The goal with air preparation components is to provide **properly prepared air**. That is what you, the customer, ultimately wants. The **most important factor** in the long life of any pneumatic tool or equipment is the **quality** of the **compressed air** in the system. For nearly 70 years Monnier, Inc. has been ensuring the quality of that air with their complete line of air preparation products.

THE WAY YOU WANT IT

Maybe you have not always been able to get that filter, regulator or lubricator exactly the way you wanted it for one reason or another. Monnier is known as the **“Air Preparation Specialist Where Custom Solutions Become Standard”**. By **machining** integral parts of our **assemblies**, we offer the **most flexible manufacturing process** in the fluid power industry. **Precision-machined tolerances** give Monnier’s airline filters, regulators, lubricators and accessories **unsurpassed strength and quality**.

Special porting, shapes and sizes are possible with that flexible machining process. Monnier can adapt to specific customer requirements in a **fraction of the time** the industry is accustomed to. Since time and money are always at a premium, let Monnier become **the value-added solution provider** for your air preparation requirements.

Model # 91-216:
Filter/Relief Valve for OEM

WHEN YOU WANT IT

When do you usually want something? Six to eight weeks from now? In some cases that is true. You may have a project down the road that has been well choreographed to allow for two month lead times. Wouldn't it be better to **have it tomorrow** though when it is necessary? At Monnier we carry the majority of our products in stock for immediate delivery. How's that for fast delivery?

WHY CHOOSE MONNIER

As we have demonstrated on these two pages, Monnier gives you **what you want, the way you want it, when you want it**. You have always been the focus of our business whether you were aware of it or not. We are anxiously awaiting the first time customer, as well as those we have been serving for over half a century. Over the last seven decades, Monnier has stayed with the manufacturing philosophy that produces **unsurpassed quality, strength and flexibility** to satisfy our customers needs.

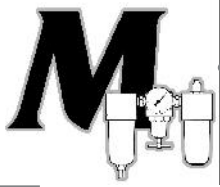

That philosophy is the reason Monnier manufactures over **1000 specially engineered solutions** annually in addition to the **3000 standard products** in our catalog.

Model # 91-129:
Adjustable Relief Valve for
the Medical Industry

So remember...

***“When good air is not enough,
keep Monnier in-line for the great air
solution to your air preparation needs!”***

MONNIER CUSTOM ENGINEERED SOLUTIONS

At Monnier we have extensive experience producing solutions tailored to your application. Whether the application calls for special porting or has precise flow and pressure requirements, Monnier will create a product to fit the need.

Monnier's **colorful anodized products** add another degree of differentiation in the marketplace. Our air preparation products can be anodized in blue, black, clear, green, red, yellow, gold and purple to **match existing OEM or custom system colors**.

By modifying existing filter, regulator or lubricator characteristics, we create thousands of custom products annually. The opposite page contains a mere outline of Monnier's capability to produce solutions for your hard to satisfy applications. Be sure to contact Monnier for your special applications as well as the standards. Let us show you how Monnier became known as the place **"Where Custom Solutions Become Standard"**.

CUSTOM ENGINEERED PRODUCTS

1. FRL with special gaskets, right-to-left, flow and an oil dome retainer.
2. Filter with pressure drop indicator adapted for liquid use.
3. Custom regulator/filter combination with protective bonnet coating.
4. Filter/regulator combinations with custom bodies.
5. Regulator with body built for manifold mounting.
6. Miniature filter with primary outlet straight through, and secondary outlet at 90°.
7. Regulator with body constructed as a valve sandwich.
8. Miniature regulator with 10-32 barbed fittings for inlet and outlet.
9. Three miniature regulators with primaries straight through and secondaries at 90°.
10. Miniature regulator with Viton poppet, Teflon diaphragm-disc and non-removable knob.
11. Miniature filter with square head and 10-32 barbed tube fittings in ports.
12. Miniature regulator with two primary ports at 90° and two secondary ports at 90°.
13. Regulators with manifold-mounting body.
14. Miniature filter with retaining ring for panel mounting.
15. Miniature regulator with bottom ports with 10-32 tube fittings.
