

# BUYERS GUIDE

FLUID POWER INDUSTRY

Welcome to the Monnier, Inc. Air Preparation Products Catalog! We refer to our catalog as the "Buyers Guide for the Fluid Power Industry" because at Monnier we feel a catalog should make buying easy for you, the customer. We are confident that we have the air preparation product your application requires in this catalog. Whether it is standard airline filters, regulators, lubricators, combinations or modular FRLs - it's right at your fingertips in the following pages.

If you can't find exactly what your applications requires - just ask! At Monnier, Inc., we take great pride in being known as the company *where custom air preparation solutions become standard*. That means that whether your application calls for a standard off-the-shelf filter, regulator or lubricator or if it requires a specially engineered solution, Monnier has the right product for you.

We offer the best delivery and the most durable and flexible product line in the industry. This catalog is a mere snapshot of the 3000 standard products Monnier produces each year. In addition to that, we create thousands of custom engineered solutions annually.

## Colorful Anodized Finishes

Monnier products have always had bodies machined from aluminum barstock. That makes them porosity free and stronger and lighter than their competitive zinc die-cast counterparts. It also allows us to offer them to you anodized in your choice of eight bright colors: blue, black, clear, green, red, yellow, gold and purple. This beauty is more than skin deep. It's done inside and out to add a measure of corrosion resistance. It also makes system or subsystem identification easier through color coding.

## Product Warranty

Monnier, Inc. warrants each product against defects in material and workmanship for a period of one year from the date of manufacture, providing its use was in accordance with Monnier, Inc. recommendations. If the product fails to perform as warranted, Monnier, Inc. will, at its option, repair or replace the product free of charge. The company will not be liable for incidental or consequential damages. We make no other warranty, expressed or implied, including warranties of merchantability or fitness for a particular purpose.

## TABLE OF CONTENTS

<b>The Monnier Advantage</b> .....	1-4
<b>Filters</b>	
Application Overview .....	5
Miniature .....	6
Compact .....	6
